Assignment-5

1. Consider an example of stack data structure. Draw a state diagram to show the various states it goes through during the push and pop operations. Derive the test cases for all state and all transition coverage.
2. Explain the different levels of testing with an example for each.
3. Explain the steps involved in OO testing.
4. What are the issues involved in OO testing.
5. Briefly explain all types of structural testing techniques.
